PROFESSIONAL SUMMARY

- M.Sc Computer Science student with hands-on experience in full-stack web development, AI-integrated applications, and machine learning projects. Skilled in Python, Django, Flask, React, PostgreSQL, and REST API development. Built scalable projects including Hospital Management Systems, AI chat applications, and machine learning solutions. Passionate about software engineering, artificial intelligence, and building impactful real-world applications.

TECHNICAL SKILLS

• Programming:

Python, SQL, JavaScript, Reactjs(Basics)

Data Analysis:

Excel, Pandas, NumPy, Matplotlib, Power BI

Web Technologies:

HTML, CSS, REST APIs

Frameworks:

Django, Flask

Databases:

MySQL, PostgreSQL

AI/ML:

Machine Learning, Data Analysis

Tools:

Git, GitHub, VS Code

AI Tools:

Antigravity, Claude, Cursor, ChatGPT

SOFT SKILLS

- Communication
- Team Collaboration
- Problem Solving
- Analytical Thinking

PROJECT

• MoniVerse AI

Developed a ChatGPT-like AI chatbot (MoniVerse AI) using React and Flask, leveraging Antigravity AI tools and a local LLM (Mistral via Ollama). Implemented real-time conversational responses along with PDF and image understanding in a modern, interactive UI.

• **Learning Management System**

Developed a full-stack Learning Management System using Django and MySQL, with features like user authentication, course management, and interactive dashboards. Designed a responsive frontend using HTML, CSS, and JavaScript to enhance user experience.

• **Plant Disease Detection**

Developed a machine learning model to classify plant diseases using image datasets, and built an interactive interface with Python and Streamlit. Improved prediction accuracy through effective data training and tuning.

• **Hospital Management System**

Developed a full-stack Hospital Management System using Django, PostgreSQL, and JWT authentication, enabling secure role-based access for patients and administrators. Designed and implemented appointment scheduling and payment workflows, enhancing operational efficiency and user experience. Utilized AI-assisted development tools (Antigravity, Claude) to accelerate feature development, optimize backend logic, and improve overall code quality.

• **Retail Sales Performance & Demand Forecasting Analytics**

Developed a Retail Sales Performance and Demand Forecasting Analytics solution using Python and Power BI to analyze sales trends, customer behavior, and product performance. Applied data cleaning, exploratory data analysis, and predictive modeling techniques to forecast demand and support business decision-making through interactive dashboards and actionable insights.

EDUCATION

• University of Madras M.Sc Computer Science 75%	2024 - 2026
• Pachaiyappas College for Men Kancheepuram B.Sc Computer Science 78%	2021 - 2024
• Bharathidasan Matriculation School 12th Standard 83%	2021
• Bharathidasan Matriculation School 10th Standard 83%	2019

CERTIFICATIONS AND INTERNSHIP

- Full Stack Developer Internship – Inspire Softtech Solutions (April 2025 - May 2025)
- AI & Full Stack Developer Internship – Hybrid Softech Solutions (Jan 2026 - June 2026)
- Data Analytics with AI – Sololearn
- SQL Certification – Scalar, Simplilearn
- English Typewriting (Junior & Senior)

ACHIEVEMENTS

- Best Student of the Year (2022)
- Rank 1 in Academics (2023)
- Badminton Winner – School Level (2018)
